TheTalentFarm Studios lies between the open expanse of the everglades and the urban sprawl of the Miami/Ft. Lauderdale area. Virtually on the fringe of the everglades, it's not uncommon to see all kinds of wildlife, especially gators strolling about.

The perfect place for a music venue! Not too close, yet not too far from civilization. "Build it and they will come"!Yeah right. Looks like we'll have to bring the venue to you instead!

And so it goes... Since 2004 TheTalentFarm studios has hosted over 2100+ bands in more than 700 shows, serving live video webcasts to more than 1.2 million viewers. The average show is 4 hours, and bands from all across America, Canada, even South Africa, have made it a point to showcase their talent to a universal audience in a truly LIVE format.

No, not a stickcam! We serve our viewers with quality video feeds from multiple cameras, and outstanding audio from our secondary mixing console, bringing them as close to the venue experience as their connection speeds will allow.

Why? Because we can!

Now if we can only figure out the money part! :)
